

## Estándares de seguridad en la cadena de suministros ISO 28000

**Capitán Charles Piersall**  
**MARITIME SECURITY – THE IMO - ISO PARTNERSHIP**  
CEO de la empresa AMADIS INC, Presidente del comité  
asesor de ANSI U

International Relationships, Standards and Regulations, the ISO/TC8 Linking instrument, and facilitating the IMO/ISO partnership. Maritime security equals global security; Supply Chain Security- the elements in the supply chain, “The ISO 28000 Series Family”- a series of interrelated standards for security of the global supply chain which was independently certified and adopted by all modes of transport; “ISO 20858 (Port security)”- implementing the IMO International Ship and Port

Facility Security (ISPS) Code,; anti-piracy and the use of independent armed security personnel on board ships; possible use of floating armouries, and the ongoing development in electronic port data and development of cybersafety for ships. (The single best

reference for maritime and supply chain security is Chapter 51 written by CAPT. Piersall, Chairman ISO/TC8 Committee on Ships and Marine Technology, in the McGraw-Hill Homeland Security Handbook: Strategic Guidance for a Coordinated Approach to Effective Security and Emergency Management, Second Edition 2nd Edition.
